Candidate Philosophy:
Britt Lindberg, AIA, LEED AP

I am a strong believer in the vision of a more streamlined AIA, where local, state, and national levels better share efforts, supporting and complementing each other efficiently. Through this, we can focus valuable resources to advocate more strongly, share more knowledge, improve programs, and better spread the word on the value of architecture, further beyond ourselves.

Communications at the California Council have and will continue to play a key role in this vision. It would be my honor to serve as your next Vice President of Communications and Public Affairs.

If elected, my primary goals would include:

- Improved digital support tools for members and components;
- Internal and external communications support for Strategic Plan Initiatives;
- Shared communications across all AIA levels.

Architecture impacts all aspects of our lives. We must strengthen our voice in the design, construction, public, legislative, and regulatory realms. We must better share our knowledge and accomplishments, and celebrate our achievements through inspiring and outward-reaching conferences and award programs.

I have successfully led similar achievements at my local chapter, and would be honored to work with you toward these goals at the AIACC. Thank you for your support!
2015-2016 AIACC VP of Communications & Public Affairs
